BASIC-ABSTRACT:

Paper base material is impregnated with a dispersion contg. metal oxide, metal hydroxide, or metal salt, and then dried to give the base material treated. The base material obtd. is impregnated with resin varnish, and the moulded into a laminated sheet. The metal oxides used are MgO, TiO₂, ZnO, Al₂O₃, SiO₂, SbO₃, etc. Metal hydroxides used are Al(OH)₃, Mg(OH)₂, Zn(OH)₂, Sb(OH)₃, etc. The metal salts used are the oxalates, phosphates, borates, silicates, and carbonates of Al, Mn, Zn, Ca, Sr, Ba and Mg. The resin varnishes used are resol type phenol resin, etc.

As lower concns. of retardant are required to give good flame retardancy, deterioration in various other characteristics are prevent.
